

DC INVERTER HIGH EFFICIENCY STANDARD AMBIENT VRF SYSTEMS

An efficient solution for more comfortable environments

High Efficiency Standard Ambient Heat Pump 380-400V 2Pipe 50/60Hz

 **YORK®**
BY JOHNSON CONTROLS

A broad line of user-friendly, earth-friendly units.

Cooling Capacity 25.4 - 211.2 kW
Heating Capacity 28.1 - 211.7 kW

- Broad compressor capacity operation range (10% - 100%)
- DC Inverter Scroll Technology
- Cooling from -5° C to +43° C DB (outdoor temperature)
- Heating from -15° C to +15.5° C WB (outdoor temperature)
- High performance - EER up to 4.29
- Green refrigerant R-410A
- Flexible and quick installation
- Smaller footprint
- Versatile indoor units
- Connection of up to 64 indoor units per refrigeration circuit consisting of 3 outdoor units
- Quiet operation

The YORK® line of VRF Air Conditioning System includes a wide range of sizes to meet most any customer's needs. Each model is designed to provide comfort and efficiency, in an easy-to-operate unit and flexible installation makes them an easy fit for a variety of applications. Models meet the highest energy efficiency ratings, so less energy is consumed without sacrificing comfort and performance. Each unit is engineered for quiet operation. And, wired or wireless remote controllers make changing comfort control settings easy with the touch of a button.

We create environments that help achieve a higher level of comfort.

No one knows building environments better than Johnson Controls. For more than 125 years, we've been in the business of building efficiency, delivering healthier environments, operational savings and sustainable solutions for our partners all over the world. In fact, we serve over one million customers and help the world reduce its energy consumption, saving customers over \$7.5 billion in energy costs.

FEATURES AND BENEFITS

High Energy Efficiency

Cutting-edge DC inverter scroll compressor technology, 64 speeds condensing BLDC blower motor, enhanced heat transfer technology and operation optimization ensures high efficiency.

R-410A

Environmentally-friendly refrigerant cools and heats more efficiently without destroying the ozone layer.

Low Ambient Cooling at -5°C

The AC will run in cooling mode when outdoor temperature is as low as -5°C to meet special user-requested applications.

Modular Design

Modular design provides flexibility to combine multiple outdoor units, providing simplified service, maintenance and cost savings.

Low Ambient Heating at -15°C

The AC will run in heating mode when outdoor temperature is as low as -15°C to meet user-requested applications.

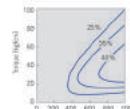

Multi-Speed Fan

Multi-speed fan helps satisfy various airflow requirement.

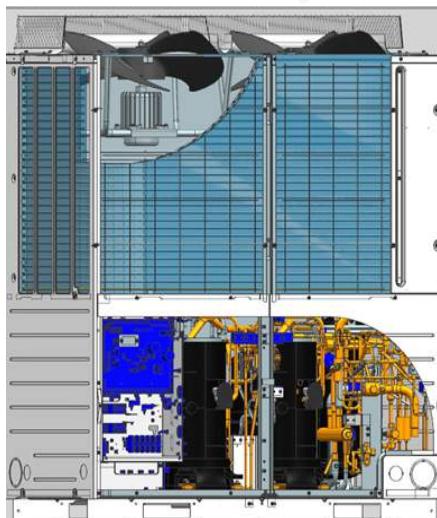

High Efficiency DC Inverter Scroll Compressor

DC inverter flexible scroll compressor is equipped with a frame compliance mechanism that allows movement in the axial direction of the frame supporting the cradle scroll. This greatly reduces leakage and friction loss, ensuring high efficiency across the speed range.

AC Motor Efficiency

DC Motor Efficiency

DC Fan Motor, 64-stage Speed Adjustment

Outdoor unit DC inverter fan motor improves efficiency by 45% and largely reduces power input. The fan is capable of a 64-stage speed adjustment and, together with the DC inverter, keeps both the compressor discharge and suction pressure stable to ensure system reliability.

Patented Flow Channel Design

Streamlined fan design improves airflow by 17% and reduces noise by 3dB compared to previous product. The fan may reduce air loss and air resistance, and increase heat exchange efficiency.

ROBUST & RELIABLE DESIGN

Performance Tested

- Capability
- Safety
- 500 hours salt spray
- 6 hours rain
- 130% over match
- 1000m pipe length & 110m drop
- EMC

Reliability Tested

- Tests during fabrication include:
Parts, Leakage, Operation and Safety
- Tests before packing include:
Visual, Function, Capacity, Acoustic test and Accessories

Advanced technologies that ensure optimal & reliable operation

- Backup operation

If one outdoor unit malfunctions, other units continue to operate without stopping the whole system.

- Duty cycle operation to extend the system lifecycle

The outdoor units' duty cycle changes every 24 hours, balancing individual unit operation time and extending inverter compressor lifecycle by as much as three times.

- Balance operation

Outdoor units start in turn to balance operation time.

First time operation

Second time operation

Third time operation

Free mix of versatile indoor units

65 models to complement many different room designs.

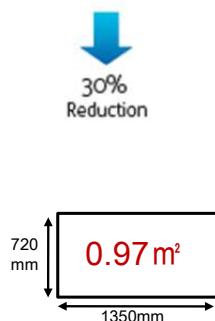

Free combination of modular outdoor units

A line up of outdoor units from 8HP to 72HP with 2HP increments which is based on 9 basic 8/10/12/14/16/18/20/22/24HP modular units, and up to 64 indoor units can be matched into a single combination system.

FLEXIBLE SYSTEM & EASY INSTALLATION

Easy Transportation

The outdoor unit occupies a space of 0.97m². It can be placed on elevators, saving installation cost and time. It also eliminates the need for an external crane.

Crate

Forklift

Easy Placement

- Total 1000m liquid refrigerant piping length
- Max 190m refrigerant piping length for single pipe
- Recommended 50m height drop when outdoor unit is above indoor unit
- Recommended 40m height drop when outdoor unit is below indoor unit
- Max 110m height drop when outdoor unit is above indoor unit
- Max 90m height drop when outdoor unit is below indoor unit
- Max 30m height drop between indoor units under same outdoor unit
- *If you wish to install VRF system in the place with level difference exceeding recommended values, please contact local sales office for piping design recommended values.

Flexible Combinations

- Up to 64 indoor units can be connected to a single refrigerant cycle
- Total indoor unit capacity can be 50-130% of outdoor units

FLEXIBLE CONTROL MEETS ANY TYPE OF APPLICATION

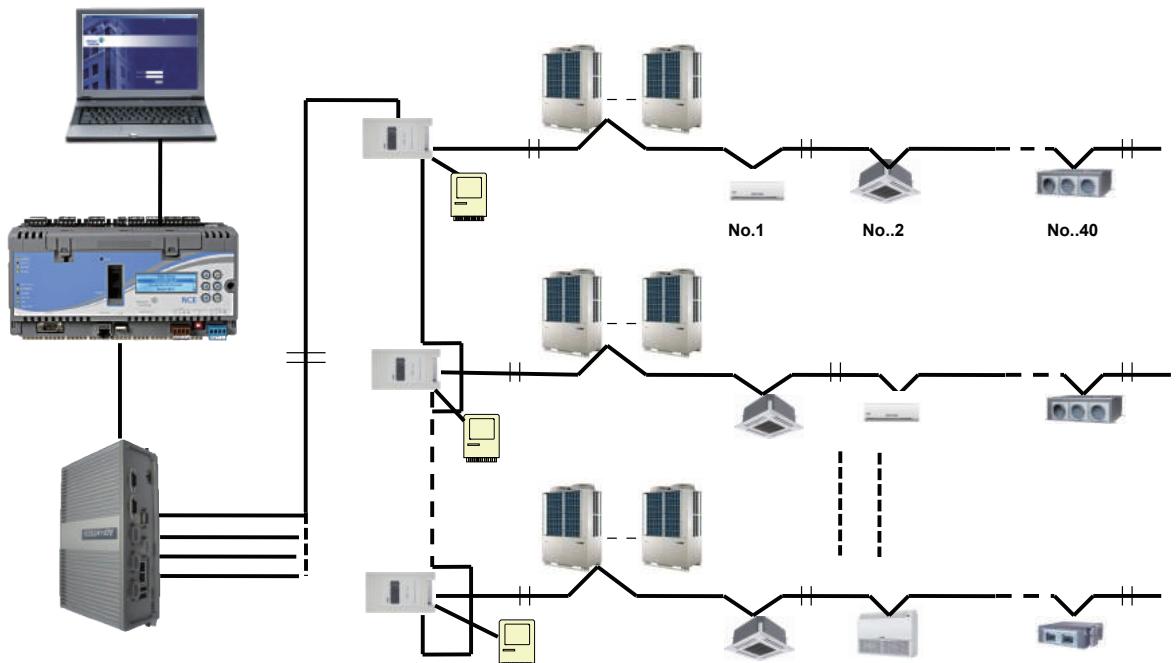

A wide variety of control options

- Wide controller
- Wireless controller
- Touch screen central controller
- Central controller with monitor software

Metasys® system - connectivity through BacNet/IP & LonWorks

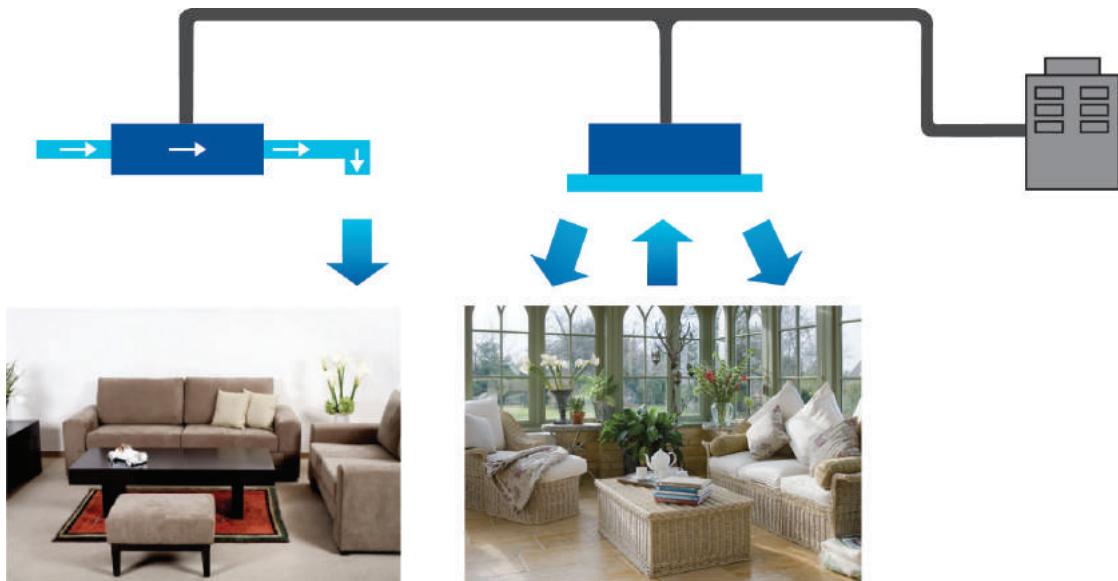

- Seamless integration to Building Management System
- Remote monitoring
- Energy management

DESIGN TO A BETTER WORLD

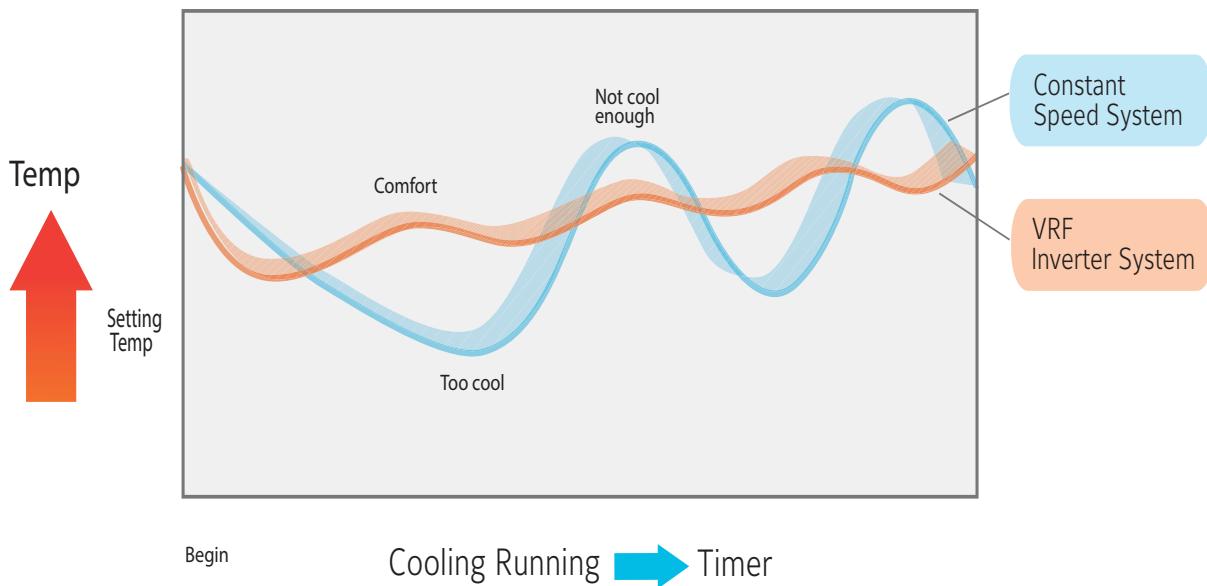

Independent fresh air system

A fresh air unit can be installed with other indoor units to introduce outdoor air for improved air quality.

Precise temperature control

Use of the inverter control helps maintain precise temperature within the range of +/- 0.5°C.

SPECIFICATION - MODULAR VRF OUTDOOR UNIT 380V

Features

- High performance – EER up to 4.29
- Frequency 50/60Hz
- Top discharge
- Smaller footprint
- Match with versatile indoor units
- Flexible and quick installation
- Quiet operation
- 9 Basic Modular units: 8HP, 10HP, 12HP, 14HP, 16HP, 18HP, 20HP, 22HP, 24HP
- Connection of up to 64 indoor units per refrigeration circuit consisting of 3 outdoor units

CONSOLE

Features

- Compact design & small space occupation
- Built-in EEV
- Quiet operation
- Easy installation and maintenance
- Air filter easily removed and cleaned
- Air discharge through Top(Cooling) or Bottom(Heating)
- Without built-in high head drain pump, not available for external drain pump
- Wireless controller as standard offer, wired controller not optional

FOUR-WAY CASSETTE

Features

- Quiet operation
 - New irregular helix design fan blade enabling the indoor unit running at lowest sound level
- Standard built-in high head drain pump
 - Up to 750mm drain-head creating the ideal solution for perfect water drainage
- Fresh air inlet except for 5.8/7.1/8.0kW
 - Pre-set fresh air inlet can introduce the outside fresh air into the room, greatly improve the indoor air quality, away from “air conditioner symptom” .
- Branch outlet except for 2.8/3.6/4.5kW
 - 1 or 2 branch outlets for flexible and better air distribution
- Advanced structure facilitating installation and maintenance
 - 90° rotation suction grille
 - Randomly installation direction
- Real compact design for 2.8/3.6/4.5kW
 - The panel dimension is 700x700mm, and the unit dimension is 570x570mm, smaller footprint, easier for installation.
- Wired controller as standard offer, wireless controller optional

FOUR-WAY CASSETTE

50/60 Hz

50Hz and 60Hz, 220-230V power supply supports regions with unstable voltage, avoids power supply demand, and saves inventory and transport costs.

Built-in Drain Pump

Built-in drain pump can pump condensation to a high level, which facilitates draining condensation from indoor unit and makes installation easier.

Quiet Operation

Technology and compact design reduce noise level to as low as 29 decibels for a super quiet and comfortable user experience.

4 Fan Settings

Smaller dimensions for easy installation and transportation, and reduces cost.

Washable Filter

Washable filter allows for convenient service and maintenance.

HIGH WALL

Features

- LED display
- Built-in EEV
- Stylish design
- Super quiet operation
- 3D air flow
- Intelligent air direction control, cooling air goes up and heating air goes down
- Vitamin C and ESF Filter Optional
- Wireless controller as standard offer, wired controller not optional
- Without built-in high head drain pump, not available for external drain pump

HIGH WALL

50/60 Hz

50Hz and 60Hz, 220-230V power supply supports regions with unstable voltage, avoids power supply demand, and saves inventory and transport costs.

LED Display

Embedded LED display screen provides for easy setting and monitoring of temperature, operation and timer modes, fan speed and error codes.

Quiet Operation

Technology and compact design reduce noise level to as low as 31 decibels for a super quiet and comfortable user experience.

Vitamin C Layer

Vitamin C Layer releases fresh vitamin C into the air to help reduce stress, soften the skin and increase immunity. (Optional)

ESF Filter

Electrostatic filter with an active carbon layer traps harmful dust and removes unpleasant odors, improving air quality and creating a fresh, comfortable environment. (Optional)

FLOOR CEILING

Features

- Flexible and easy installation
 - Installed on the floor or in the ceiling
 - Installation space greatly decreased
 - Easy service and easy installation
- Ultra thin body, only 199mm for 2.8~7.1kW
- Large angle air supplying
 - 100° wide angle louvers and 70° wide angle blades design
 - Precise control of air flow
 - Equally distributed comfortable air flow to every corner of room
- Without built-in drain pump, optional external drain pump
- ESF Filter Optional
- Wired controller as standard offer, wireless controller optional

SLIM LOW STATIC PRESSURE DUCT

Features

- Ultra thin design saving installation space
 - Only 185mm height x 500mm depth
- 0 or 30Pa selectable external static pressure
- Knock down drain pan
 - Easy disassembly
 - Two side drainage available by changing drain pan direction
- Built-in high head 750mm drain pump
- Concealed installation perfectly matching with indoor room decoration
- Multi-mode installation
 - With or without air return duct
 - Bottom or rear air return
- Wired controller as standard offer, wireless controller optional

MEDIUM STATIC PRESSURE DUCT

Features

- Standard built-in high head drain pump
 - Up to 750mm head for 5.6~8.0kW
- External drain pump optional for 9.0~14kW
- Free setting of air discharge duct
 - Free selection of air flow outlets and installation position
- Wired controller as standard offer, wireless controller optional

MEDIUM STATIC PRESSURE DUCT

50/60 Hz

50Hz and 60Hz, 220~230V power supply supports regions with unstable voltage, avoids power supply demand, and saves inventory and transport costs.

4 Fan Settings

Smaller dimensions for easy installation and transportation, and reduces cost.

Washable Filter

Washable filter allows for convenient service and maintenance.

HIGH STATIC PRESSURE DUCT

Features

- High external static pressure design
 - Max. external static pressure of 196Pa
 - 100 or 196Pa selectable static pressure
- Without built-in drain pump, optional external drain pump
- Free setting of air discharge duct
 - Free selection of air flow outlets and installation position
- Wired controller as standard offer, wireless controller optional

HEAT RECOVERY VENTILATOR

Features

- Efficient heat recovery air processing
 - Exchange the heat between supplied air and exhausted air, equalizing the outdoor air to indoor temperature
 - Decrease the interior heat load to save energy
- Replaceable heat exchange media

About Johnson Controls

Johnson Controls is a leading provider of equipment, controls and services for heating, ventilating, air-conditioning, refrigeration and security systems for buildings. Operating from 500 branch offices in 150 countries, we create building environments that help people achieve more by delivering products, services and solutions that increase energy efficiency and lower operating costs. We are involved in more than 500 renewable energy projects including solar, wind and geothermal technologies. Our solutions have reduced carbon dioxide emissions by 13.6 million metric tons and generated savings of \$7.5 billion since 2000. Many of the world's largest companies rely on us to manage 1.5 billion square feet of their commercial real estate.
